

Configure gloogLight

Vista Mail

To configure your Vista Mail, please follow the detailed steps below.

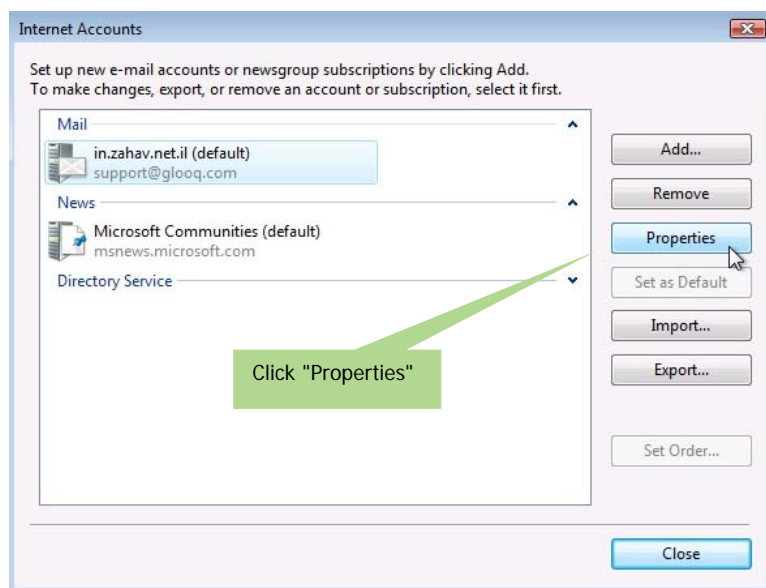

1.

Open your Vista Mail client. Click "Tools" → "Accounts...".

2.

Select your mail account and click "Properties".

3.

- Change the "Outgoing mail server (SMTP)" to the address that is given to you by glooq.
- After you change the SMTP server name, select the checkbox: "My server requires authentication".
- After you change the SMTP server name, click "Settings".

Do not change the "Incoming mail server (POP3)" or "E-mail username". These settings are for your incoming mail and are not managed by glooq.

General Servers Connection Security Advanced

Server Information

My incoming mail server is a server.

Incoming mail (POP3):

Outgoing mail (SMTP):

Incoming Mail Server

E-mail username:

Password:

Remember password

Log on using Secure Password Authentication

Outgoing Mail Server

My server requires authentication
